DEMOCRACY, THE EFFECTIVE PROTECTION OF Human Rights and the Rule of Law are three of the most cherished principles of the European Union, which, however, are suffering under the challenges, if not the potential rifts, arising out of the deep and multifaceted political, financial and social changes that European Union is facing and is called upon to address. The obligation to strengthen the Union's presence and role in the difficult and dense globalized international environment underscores the need for reorienting the Union and dealing with threats against the European constitutions, the Rule of Law, and the independence of the Judiciary.

THE CONTRIBUTIONS TO THE PRESENT VOLUME of the President of the Hellenic Republic, distinguished supreme judges and prominent academics from various Member-States of the Union refer to the important international scientific event on the topic "The Crisis of the Rule of Law in the European Union", which took place in Athens on 13 November 2018 [...] The published studies are either elaborated or extended versions of oral presentations or [...] broader reflections and analysis on the major issues that have been discussed, deriving not only from the presentations, but also from the fruitful debate that has developed in the context of the event. The authors of the volume [...] are prominent scholars with extensive expertise on the European unification process, and convey, in this regard, their symbolic and intellectually rich interference in the European public sphere.
